

-ABOUT THE SPEECH CONTEST-

In order to provide chance to students, this speech contest event held every year has been conducted for you all to talk and think on environmental conservation.

We have established Hiyoshi India providing total environmental support. We are now providing opportunity through this speech contest to all of you to work in Hiyoshi India and do action on environmental protection.

It would be greatly happy if you could bring it in your action.

-LASTLY-

I hope India shall become environmentally clean country, good public health with economic growth by all of your action. All the best for your today speech contest. Hope to see you soon in Japan. Best of Luck!!

"Talk Your Way to Japan" Speech Contest

Since 1995

Steps to Save our Environment

"Talk Your Way to Japan" Speech Contest

-MESSAGE FOR CELEBRATING THE 20th ANNIVERSARY-

こんにちは (Konichiwa = Hello). I am very happy to see you all and glad to invite you all to this event "Talk your way to Japan".

Mr. Suzuki, Chairman of Hiyoshi Corporation, and Mr. M.R.Ranganathan, Chairman of ABK AOTS DOSOKAI TAMILNADU CENTRE, Chennai, have started this speech contest event as Joint program of 20th Anniversary of ABK AOTS in 1995. We are now celebrating 20th anniversary of the speech contest.

Every year, four students from India who won the air ticket have been visiting Japan for two weeks for environmental education and cultural exchange. So far, Hiyoshi have received more than 70 students from India as speech contest winners.

-INDIAN ENVIRONMENT AND ITS CONSERVATION-

India is the second most populated rich country and becoming economically powerful country in the world. According to the survey report, India is expected to become the 3rd strongest economic country in the world, next to the United States and China in 2025, if no abnormal happening such as natural disaster etc.

If India become the 3rd position in economy, everyone's life becomes promised wealth, abundance and happy, however, at the same time, there is strong sense of responsibility and duty to conserve the environment from pollution.

So far I have visited India for more than 10 times, since 1980s, I feel the environment in India getting worsen due to the industrialization and keep focusing only on economic growth.

I am happy to see all young people coming here to talk about environment. I feel Indian environment in the future will become bright and clean with your thoughts and action.

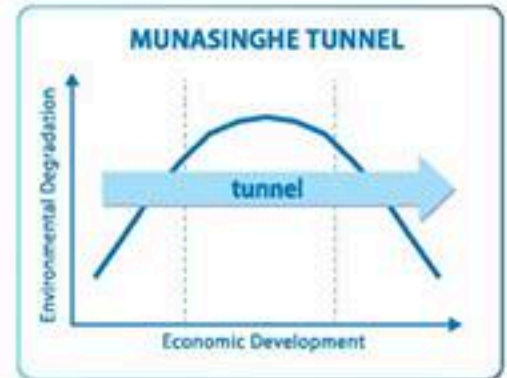

-THE MUNASINGHE TUNNEL-

If we see our history in Japan, there was environmental pollution due to the high economic growth in 1960s-1980s. We had spent huge amount of money and time to restore our environment back in good condition.

Based on our experience, I strongly recommend you to keep paying serious attention to environmental conservation along with Economic growth.

The MUNASINGHE TUNNEL introduced by an Indian says that during high economic growth of a country, the country has been heavily polluted due to the industrialization and disinterest of environmental care. The MUNASINGHE TUNNEL which help country to understand the importance of the environment. X-axis represent economic development and Y-axis represent environmental degradation (pollution). If country moves towards the high economic development, it must face environmental pollution but it can be avoided by understanding and paying serious attention with dedicated action against environmental pollution like tunnel crossing.

-WORK TO SAVE INDIAN ENVIRONMENT-

On January 2011, we have established Hiyoshi India Ecological services Pvt. Ltd. in Chennai, as environmental services company, providing job opportunity to all who has ambition and interested to work in environmental field for conservation of Indian environment. Hiyoshi India provides total environmental support such as Environmental measurement & analysis, water quality analysis, soil analysis etc., drinking water and sewage water treatment plant maintenance, conservation activity etc.

Hiyoshi India door is always open for all. You can come and work along with our Japanese staff and Indian staff to make environmental conservation services. Hiyoshi Corporation, Japan shall provide constant support to Hiyoshi India in all the technical aspect and teach our know-how and knowledge which we gained from our 60 years of experience in Japan.

If necessary, Hiyoshi India's staff will be given training in Japan and can gain experience, which will help them to do best work and smart way to provide solution to the environment conservation in India through Hiyoshi India.
